AVIATION PQS USER'S GUIDE

This guide will explain the Personnel Qualification Standards (PQS) program, what it is, and how to use it.

I. WHAT IS PQS?

PQS is a part of your Command's overall training program. It provides the minimum requirements to qualify on a Watchstation/Support Action. It is a method for qualifying officer and enlisted personnel in certain assigned duties. This PQS will assist you in becoming a more productive member of the "combat-ready qualified Navy team."

II. WHAT MAKES UP THE PQS PROGRAM?

The PQS program consists of the Standard booklet and the Progress Chart.

A. The Standard booklet contains questions you must be able to answer and performance items you must be able to do in order to qualify for a particular Watchstation/Support Action. Standards are written by naval personnel after asking themselves, "What do I need to know to do the job properly?"

The Standard booklet is made up of the following parts:

1. TABLE OF CONTENTS
2. USER'S GUIDE
3. DEFINITIONS OF WORDS USED IN PQS
4. CONTRIBUTING FLEET PERSONNEL
5. ENLISTED AVIATION WARFARE SPECIALIST (EAWS) CROSS-REFERENCE
6. FUNDAMENTALS AND SYSTEMS SUMMARY
7. FUNDAMENTALS (100 SECTION)
8. SYSTEMS (200 SECTION)
9. QUALIFICATION SECTION
10. WATCHSTATIONS/SUPPORT ACTIONS (300 SECTION)
11. FEEDBACK FORM (CHANGE REQUEST)

B. The Progress Chart is used to display all the Standards in progress or that have been completed by your division or work center. Your division officer uses the progress chart to determine who is qualified to stand the watches or perform the tasks required by your division. You should check the progress chart periodically to make sure all of the Standards you have completed have been recorded.

III. PQS FORMAT

A. The numbers in PQS follow a definite pattern. The following breakdown of the numbering system is a handy key to PQS format:

1st thru 3rd Digit

- 100 section = Fundamentals
- 200 section = Systems
- 300 section = Watchstations/Support Actions

B. Each Fundamental, System and Watchstation/Support Action is assigned a three-digit number.

Example: 205

205 - Indicates section 2 (System section) and that it is the 5th System

In the systems part of your Standard booklet, you may find a format such as the following example. For item .21 you must answer questions A, B and C. For item .21 a. only questions A and B are required. If there is no grid with X's, all questions must be answered.

205.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What is the source of power?

.21 Wind-measuring set (B-3)
a. Wind direction indicator

A	B	C
X	X	X
X	X	

C. Qualification Group Numbering System

The Watchstation/Support Action section (300) is divided into qualification groups. Your book may be used for more than one final qualification such as AN/SMQ-6(V) Meteorological Data Receiver-Recorder Set Operator. Each group is indicated on a Final Qualification Sign-Off Page as follows:

Example: NAVEDTRA 43204A-Q1

43204 - Indicates NAVEDTRA number assigned to the PQS package
A - Indicates first revision
Q1 - Indicates the first qualification group

1. FUNDAMENTALS (100 Section) This section identifies basic knowledge needed to do the job properly. Normally you would have acquired this knowledge during the school phase of your training. If you have not been to school, the requirements are outlined and the references listed will aid you in a self-study program.

2. SYSTEMS (200 Section) In systems, the subject under discussion is broken down into functional sections that may be compared to the electrical system in your car. The components of the electrical system are scattered throughout your car, but taken all together they form the "electrical system." The same is true of the equipment you are studying. The components may not all be located in one place, but they still form a system.

3. WATCHSTATION/SUPPORT ACTION (300 Section) This section contains the procedures you need to know to properly perform your job. Watchstations/Support Actions are divided into final qualification "groups" (Qual 1, Qual 2, etc.) with each group containing the following:

a. Final Qualification Sign-Off Page

Final record that is filed in your training jacket and recorded in your Service Record upon final qualification

b. Qualification Summary Page

Record of completion of other PQS qualifications, and Watchstations/Support Actions within a qualification group

c. Watchstations/Support Actions (Task Sign-Off Pages)

Record of completion of performed tasks and instruction watches for each Watchstation/Support Action

IV. HOW TO QUALIFY

Your division officer or work center supervisor will issue you a PQS booklet. Your supervisor will assign Watchstations/Support Actions and set time limits (goals) for completing your qualification. Progress toward qualification will be monitored on the division/work center Progress Chart.

A. Open your Standard booklet to your assigned Watchstation/Support Action. At the beginning of the Watchstation/Support Action you will find a list of items that must be completed before starting your tasks. Standards may include Watchstations/Support Actions other than the one on which you are working. You should concentrate on the prerequisites for the Watchstation/Support Action to which you have been assigned. Do not delay your qualification by spending time on others.

B. Complete the Safety Precautions Fundamentals first, then the rest of the required Fundamentals and Systems. Your supervisor may require you to complete these in a certain order, if not, the choice is up to you. If you do not know the answer to a question in the Standard booklet, look up the answer in one of the reference books listed. If you cannot find the answer in the reference books, ask your supervisor for help.

C. As you complete a Fundamental or System section, have the Qualification Petty Officer sign your Fundamentals and Systems Summary page. When you have completed all prerequisites, you are ready to start the performance items listed for that Watchstation/Support Action. Report your completion of all requirements of that Watchstation/Support Action to your supervisor.

V. THE SUPERVISOR

As a senior petty officer, you will be required to assign junior personnel to complete specific Watchstations/Support Actions in PQS. When you do this, always look through the Standard booklet to determine other items that should be completed before work is started on the required Watchstations/Support Actions or related Fundamentals and Systems. If you are assigning more than one Watchstation/Support Action or section to be completed, it is your decision to specify which one should be completed first. The supervisor is an extremely important part of the PQS program if it is to be successful. If you administer PQS with insight, you will find that PQS is a helpful tool that can fit into your overall training plan. You will be responsible for the accuracy, updating, and tailoring of PQS to fit your command's needs, as well as for the initiation of appropriate feedback to the PQS Development Group (feedback forms are located in the back of each Standard booklet). You should provide motivation to your personnel by assigning goals, showing interest, and following the trainees' progress. The supervisor is responsible for training and should be the one to update and maintain the progress chart. It is important that the supervisor be aware of who is and who is not progressing, as well as where counseling or individual instruction may be needed. A sample PQS progress chart can be found in the PQS Manager's Guide (NAVEDTRA 43100-1B). As a supervisor you must be totally familiar with the duties, responsibilities, and assignments of your Qualification Petty Officers. Your PQS program cannot survive without good planning and quality control.

VI. THE QUALIFICATION PETTY OFFICER

A. Selection as a Qualification Petty Officer means that you are one of the command's subject matter experts on those Fundamentals, Systems, and Watchstations/Support Actions assigned to you. PQS cannot be successful without you. Your job is to be totally knowledgeable in your assigned areas, to make yourself available to check off your trainees' achievements, and to ensure that a high-quality PQS program is maintained in your division.

B. Each Qualification Petty Officer should have a set of standard answers for the Watchstations/Support Actions so that all trainees receive the same answer. If multiple signatures are required for a line item, it is preferable that one working day or one watch elapse between signatures. If the trainee does not know the correct answer, it is your responsibility to help find the answer in the reference material. This will speed up the process of qualification and will familiarize your trainees with the use of publications. Obviously, this requires that you know where all the answers can be found.

C. As the Qualification Petty Officer you will be the most likely individual to discover discrepancies in the Standard booklet. Any discrepancies noted should be brought to the attention of your supervisor so that appropriate tailoring and corrections can be made. It must be understood that the PQS booklet should be tailored to fit your command's needs. Such tailoring is to be accomplished only with approval of your Commanding Officer or a designated official.

DEFINITIONS OF WORDS USED IN PQS

AIRCREW EVOLUTION - A grouping of aircrew tasks that measure performance in the course of a flight

COMPONENTS - Major units that make up a system when properly connected

COMPONENT PART - A major part of a component

CONTROL SIGNAL - A signal used to control electronic or mechanical devices

EMERGENCY - An event or series of events in progress that will cause damage to equipment or personnel unless immediate corrective steps are taken

FUNDAMENTALS - Basic facts, theories, laws or principles (100 Section in PQS)

INTERLOCK - A protective device to prevent the unsafe operation of equipment or to sequence the action of systems, components or component parts

MAINTENANCE ACTION - A maintenance technician qualification that measures ability to perform a designated task

MAINTENANCE OPERATION - A qualification that measures the ability to perform tasks (using established procedures) to determine the need for maintenance

NORMAL OPERATING VALUE - The point at which satisfactory performance may be expected

PARAMETER - A variable (temperature, pressure, flow rate, voltage, current, frequency etc.) that must be indicated, monitored, checked or sensed during operation or testing

PROTECTIVE FEATURE - A device designed to prevent damage or injury

SENSING POINT - The point in a system at which a signal may be detected

SETPOINT - The value of a parameter at which: (a) an alarm is set off, (b) operator action is required, (c) valves open or shut, (d) proper operation stops and damage may occur, or (e) the optimum value for normal operation

SUPPORT ACTION - A qualification that measures the ability to perform specific or repetitive tasks that do not involve the correction of a malfunction or repair of equipment

SYSTEMS - Groups of components that operate together to perform specific functions (200 Section in PQS)

SYSTEM INTERFACE - (a) How outside influences affect the operation of this system, or (b) How the operation of this system affects the operation of other systems or equipment

TOLERANCES - Maximum and minimum allowable values of a parameter

WATCHSTATION/WORKSTATION - An operator qualification that includes duties, assignments or responsibilities that an individual may be called upon to perform (not necessarily limited to a specific time period)

CONTRIBUTING FLEET PERSONNEL

The following personnel, under the supervision of the PQS Development Group, made a significant contribution to the development of this PQS for Shipboard Aerographer:

CWO3	M. HARDER	NAVEASTOCEANCEN, Norfolk, VA
AGCS	T. M. MIOVAS	NAVOCEANCOMFAC, Bay St. Louis, MS
AGC	B. L. EISNER	USS INDEPENDENCE (CV-62)
AGC	J. G. EVANS	NAVOCEANCOMDET, Miramar, CA
AGC	A. H. V. NOWICKI	NAVOCEANCOMFAC, San Diego, CA
AGC	M. L. PENROD	NAVOCEANCOMFAC, Bay St. Louis, MS
AG1	J. P. WEYLAND	NAVPOLOROCEANCEN, Suitland, MN

ENLISTED AVIATION WARFARE SPECIALIST (EAWS)
PQS CROSS-REFERENCE

Upon completion of this PQS, the requirements for the following line items from the EAWS PQS (NAVEDTRA 43423, March 1980) will be satisfied:

216 and 217

- d. International Cloud Atlas (NAVAIR 50-1D-509)
- e. Occupational Standards with References, Programmed Instructions, and Job Qualification Requirements Listing (LPO-REF-001)
- f. NAVOCEANCOMINST 3140.1
- g. NAVOCEANCOMINST 3144.1

.1 Define and discuss the following:

- a. Clouds
- b. Ceiling
- c. Visibility
- d. Precipitation
- e. Cloud classification
- f. Stages
- g. Cloud types
- h. Stable and unstable conditions
- i. Partial obscuration
- j. Total obscuration
- k. Intensities of precipitation
- l. Weather element contractions
- m. Cloud entry contractions
- n. Type of observation
- o. Time of observation
- p. Greenwich mean time (GMT)

.2 Define how the following information is derived:

- a. Ambient temperature
- b. Atmospheric pressure
- c. Cloud heights
- d. Surface winds
- e. Pressure altitude/density altitude
- f. Dewpoint and relative humidity
- g. Ship's position

.3 Explain how and where the following information is entered on the Commander Naval Oceanographic Command (CNO) Form 3140/8:

- a. Sky and ceiling
- b. Visibility
- c. Weather and obstruction to vision
- d. Temperature/dewpoint/seawater temperature
- e. Wind
- f. Pressure
- g. Sea/swell waves
- h. Synoptic data
- i. Remarks and supplemental data

.4 Explain the frequency and reporting requirements for surface weather observations.

References:

- a. FMH-3 (NAVAIR 50-1D-3)
- b. FMH-4 (NAVAIR 50-1D-4)
- c. FMH-5 (NAVAIR 50-1D-5)
- d. FMH-6 (NAVAIR 50-1D-6)
- e. Radiosonde Receptor AN/SMQ-1 (NAVAIR-50-30SMQ1-5)
- f. Ballistic Wind and Density for Naval Gunfire (OP-3784)
- g. Meteorological Ballistics (NWRF-42-0665-105)
- h. Occupational Standards with References, Programmed Instructions, and Job Qualification Requirements Listing (LPO-REF-001)

- .1 Define and explain the following terms as applied to a baseline check:
 - a. Visual inspection of the radiosonde
 - b. Calibration chart
 - c. Ordinate values
 - d. Zero recording
 - e. Sensitivity check
 - f. Low reference
 - g. Baseline check box
 - h. Requirements of a baseline check
 - i. Temperature and humidity evaluators
 - j. Surface contact at release
- .2 Define and explain the following adiabatic chart and recorder record parameters:
 - a. Mandatory levels
 - b. Significant levels
 - c. Required level entries
 - d. Inversions and supers
 - e. Mean virtual temperature
 - f. Pressure altitude
 - g. Contact
 - h. Extrapolations
 - i. Tropopause
 - j. Level entry abbreviations
 - k. Flight termination
 - l. Mission data abbreviations on trace/charts
 - m. Calibration trace (monthly PMS)
- .3 Define the following terms as applied to radiosonde transmitter terminology:
 - a. Thermistor
 - b. Hygristor
 - c. Detent click value
 - d. Baroswitch assembly
 - e. Rainshield and air duct
 - f. Test leads
 - g. Antenna and frequency
 - h. Test lead color code
 - i. Preflight battery test

106 RADIOSONDE OBSERVATION FUNDAMENTALS (CONT'D)

.4 Define the following balloon terminology:

- a. Balloon storage
- b. Balloon conditioning methods
- c. Free lift
- d. Nozzle lift
- e. Rate of inflation
- f. Tying the neck
- g. Train assembly
- h. Train regulator
- i. Ascension rate
- j. Balloon release safety

.5 Define the upper air code and additional data groups:

- a. Mandatory levels
- b. Position on marsden square
- c. Date and time of observation
- d. Significant levels
- e. Tropopause group
- f. Supers and termination
- g. Missing data and extrapolated data

.6 Discuss the following:

- a. At-sea wind observation procedures
- b. Refractivity
- c. Obtaining ballistic wind data
- d. Release time schedules
- e. Observation time schedules

References:

- a. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)
- b. Occupational Standards with References, Programmed Instructions, and Job Qualification Requirements Listing (LPO-REF-001)

.1 Explain and/or define the following:

- a. Automatic picture transmission (APT)
- b. APT predict message
- c. APT terminal ground equipment
- d. Ascending node
- e. Ascending node time
- f. Degradation
- g. Descending node
- h. Distortion
- i. Earth synchronous orbit
- j. Infrared (IR)
- k. Nodal increment
- l. Nodal period
- m. Orbit
- n. Orbit number
- o. Subpoint
- p. Subpoint track
- q. Sun synchronous orbit
- r. Terminator
- s. Time after ascending node
- t. Tracking
- u. Tracking or plotting board
- v. Tracking diagram
- w. Tracking overlay
- x. Weather facsimile (WEFAX)
- y. Doppler effect

.1 Define the following terms:

- a. Antenna positioning subsystem (APS)
- b. Data processing subsystem (DPS)
- c. Debug
- d. Parity error
- e. Degauss tape
- f. Slew
- g. Real time
- h. Flight test vehicle (FTV)
- i. Ascending node
- j. Descending node
- k. Nodal longitude (LN)
- l. Nodal time (TN)
- m. Battle override
- n. Worldwide voice (WWV)
- o. Bit rate
- p. Signal threshold

.2 Describe the purpose/use of the data memory data message (DMDM).

.3 Describe base band equipment and how it is used.

References:

- a. NAVOCEANCOMINST C3160.4
- b. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)
- c. Occupational Standards with References, Programmed Instructions, and Job Qualification Requirements Listing (LPO-REF-001)

- .1 Explain the application of Snell's Law to refraction of sound.
- .2 Define limiting ray as it applies to shadow zone, critical angle propagation.
- .3 Depict the five basic velocity profiles showing the following:
 - a. Limiting ray
 - b. Shadow zone
- .4 State the effects of varying sea conditions and bottom types on reflection.
- .5 Define the following terms as used in antisubmarine warfare (ASW) products:
 - a. Alpha index
 - b. Ambient noise
 - c. Acoustic sensor range prediction (ASRAP)
 - d. Airborne expendable bathythermograph (AXBT)
 - e. Bathythermograph (BT)
 - f. Best depth
 - g. Bottom bounce
 - h. Convergence
 - i. Convergence zone
 - j. Critical angle
 - k. Density
 - l. Depth excess
 - m. Depth required
 - n. Frequency, sound
 - o. Gradient
 - p. In-layer/below-layer gradient
 - q. Isothermal
 - r. Isovelocity
 - s. Main thermocline
 - t. Passive/active sonar
 - u. Pressure
 - v. Propagation loss
 - w. Ray path
 - x. Refraction
 - y. Salinity
 - z. Scattering
 - aa. Sea state
 - ab. Shadow zone
 - ac. Shallow water
 - ad. Ships/helicopter acoustic range prediction system (SHARPS)
 - ae. Snell's Law

OCEANOGRAPHIC/AcouSTIC PREDICTION AND SUPPORT FUNDAMENTALS (CONT'D)

- af. Sonic layer depth (SLD)
- ag. Sonobuoy
- ah. Sound channel
- ai. Sound velocity
- aj. Source level
- ak. Surface duct
- al. Thermocline
- am. Thermocline gradient
- an. Environmental variability
- ao. Wave height
- ap. Expendable bathythermograph (XBT)
- aq. Predesignated high-interest tactical area ranges (PHITAR)
- ar. Bathythermograph (BT) log
- as. Integrated command ASW program (ICAP)
- at. Mixed layer depth (MLD)
- au. Shipboard expendable bathythermograph (SXBT)
- av. Transients
- aw. Acoustic product request (APR)
- ax. Acoustic variability
- ay. Active/passive sonar equations
- az. Basic hull-mounted and towed array sonar systems
- ba. Submarine characteristics

.6 Describe the use of the following messages/worksheets:

- a. Active ASRAP
- b. SHARPS
- c. PHITAR/passive
- d. ICAP

References:

- a. COMNAVOCEANCOM Tactical Support Products Manual (U) Volume 1 (NAVOCEANCOMINST 3160.4)
- b. Aerographer's Mate 1 & C (NAVEDTRA 10362)
- c. Naval Ocean Systems Center (NOSC) Technical Document 481

- .1 Discuss the following:
 - a. IREPS/EM system
 - b. Coverage diagram and its use
 - c. Loss diagram and its use
- .2 Explain what atmospheric conditions are needed for the following:
 - a. Evaporative duct
 - b. Surface duct
 - c. Elevated (aloft) duct
- .3 Explain how surface and airborne platforms can be maneuvered to cover holes or benefit from them.
- .4 Explain how the officer in tactical command can use extended ranges to his benefit.
- .5 Explain where jammer-type aircraft should be placed for maximum benefits.

References:

- a. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)
- b. Occupational Standards with References, Programmed Instructions, and Job Qualification Requirements Listing (LPO-REF-001)

.1 Describe the scope and service use of the following:

- a. Defense Mapping Agency Catalog of Maps, Charts, and Related Products, Part 2, Vol II - Weather Plotting Charts (NAVAIR 50-1G-518)
- b. DD Forms 1348-1, 1348-6, 1149, and 1250
- c. Servmart
- d. Operating target (OPTAR)
- e. Meteorological stock points
- f. 13-digit national stock numbers
- g. Inventory
- h. NAVSUP 2002
- i. Meteorological Equipment for Navy Meteorological Units (NAVAIR 00-35QL-22)
- j. Seamart

.2 Discuss the following publications and their uses:

- a. NAVOCEANCOMINST 3140.1
- b. SECNAVINST 5210.11 SSIC
- c. OCEANAVINST 5212.1
- d. OPNAVINST 3120.22

.3 Discuss the following records and reports:

- a. Commander Naval Oceanographic Command (CNOC) Form 3140/6
- b. CNOC Form 3140/10
- c. Enlisted Distribution Verification List (EDVR) 1080-1

.4 Discuss the following:

- a. Office filing
- b. Preparation of forms
- c. Security and classification of weather messages
- d. Preparation of standard Navy correspondence

Reference:

- a. OPNAVINST 5510.1
- .1 Identify and define the following types and/or terms of security:
 - a. Physical
 - b. Transmission
 - c. Personal
 - d. CRYPTO
 - e. Communications
 - f. Classifications
 - g. Clearances
 - h. Areas
 - i. Classified material storage (CMS)
- .2 Define the following terms as applied to communications security:
 - a. Handling
 - b. Stowage
 - c. Destruction
- .3 Describe the following as applied to emergency destruction:
 - a. Priority of destruction
 - b. Authority to destroy
 - c. Methods of destruction

References:

- a. Navy Safety Precautions for Forces Afloat (OPNAVINST 5100.19)
- b. Standard Organization and Regulations of the U.S. Navy (OPNAVINST 3120.32)
- c. Accident Prevention Manual (OPNAVINST 5101.2)
- d. Standard First-Aid Training Course (NAVEDTRA 10081)

- .1 Explain how various levels of electrical potential affect current flow through the body.
- .2 Explain how variations in environmental conditions affect body resistance.
- .3 Explain how electrical shock can be prevented when working on an energized circuit.
- .4 Explain the purpose of insulating material and describe its application to personnel protection.
- .5 Explain proper procedures to be observed when using test equipment.
- .6 Explain the procedure to be followed prior to working on electrical machinery or equipment.
- .7 Explain how a shorting bar is used to discharge capacitors.
- .8 Explain the use of interlocks installed in/on electrical equipment.
- .9 Explain the purpose and use of danger tags/caution tags.
- .10 Describe proper replacement of fuses.
- .11 Describe the safety precautions applicable to portable electrical equipment.
- .12 Describe the dangers of open electrical circuits due to environmental conditions.
- .13 Explain the procedures to be followed when combating an electrical fire.
- .14 Name the agents to be used for fighting electrical fires and explain the proper application of each.
- .15 Explain the desirable characteristics of a good cleaning agent for electrical equipment.
- .16 Name the desirable cleaning agents for electrical equipment.
- .17 Describe the hazards which can be encountered with cleaning agents due to environmental conditions.
- .18 Explain the procedures for removing a victim from an energized circuit.

113 SAFETY PRECAUTIONS FUNDAMENTALS (CONT'D)

- .19 Explain the proper treatment for electrical shock.
- .20 Describe the proper procedures for the preferred method of artificial respiration and cardiac massage.
- .21 Explain the proper procedure for treating burns and wounds.
- .22 Explain the proper procedure for neutralizing and removing acid from skin and eyes.
- .23 Describe and explain the following as applied to going aloft:
 - a. Safety harness
 - b. Notification of intent to go aloft (going aloft chit)
 - c. Securing circuits/tag-out requirements
- .24 Discuss the eight basic accident cause factors as defined in the Accident Prevention Manual.

References:

- a. NAVOCEANCOMINST 3140.1
- b. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)
- c. Aerographer's Mate 1 & C (NAVEDTRA 10362)
- d. Evaluating and Encoding BT Data (NWS-AG-A-050)

201.1 What is the function of this system?

- .11 Refer to a standard print of this system or to the actual equipment.
- .12 Refer to notes, cautions, and warnings as stated in MIMs and MRCs.

201.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What is the source of power?
- D. What are the modes of operation or control?
- E. What are the safety/protective devices?
- F. What protection is provided by it?
- G. What are the probable indications if this component fails?
- H. What is the source of control signals?
- I. What are the positions and functions of each position?

	A	B	C	D	E	F	G	H	I
.21 Canister	X	X				X	X		
a. Pin		X	X					X	
.22 Launcher		X	X	X	X				
a. Breech		X	X	X	X		X	X	
b. Ball valve		X	X	X	X		X	X	
.23 Recorder		X	X	X	X	X	X	X	
a. Pen assembly		X	X				X	X	X
b. Chart			X	X					
c. Chart drive assembly			X	X			X		
d. Fast-feed switch			X	X	X		X	X	
e. Calibration switch			X	X			X	X	
f. Indicator lights (2)			X	X			X		
g. Paper holders (2)			X	X					
h. Power switch			X	X			X	X	

201.3 PRINCIPLES OF OPERATION

- .31 How do the components work together to achieve the system's function?
- .32 What indications will you receive if the system is malfunctioning?

201.4 PARAMETERS - None to be discussed.

201.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Excessive speed of ship
- b. Fluctuation of power
- c. High sea state
- d. Poor grounding
- e. Power surge
- f. Loss of power

201.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

Reference:

- a. Manufacturer's Technical Manual

202.1 What is the function of this system?

- .11 Refer to a standard print of this system or to the actual equipment.

202.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components
and component parts:

- A. What is its function?
- B. Where is it located?

- .21 Motor speed control
- .22 Drum engaging lever
- .23 Power switch
- .24 Standby/monitor/talk switch
- .25 Power lamp
- .26 Fuse
- .27 Start phase switch
- .28 Function selector
- .29 Contrast control
- .210 Signal level meter
- .211 Gain control
- .212 Earphone jack
- .213 Radio receiver jack
- .214 Carbon mike jack
- .215 Radio transmitter jack
- .216 Motor jack
- .217 Line jack
- .218 Line binding post

202.3 PRINCIPLES OF OPERATION - None to be discussed.

202.4 PARAMETERS - None to be discussed.

202.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

202.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.)
apply to this system?

References:

- a. NAVAIR 50-1G-518
- b. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)

203.1 What is the function of this system?

- .11 Refer to a standard print of this system or to the actual equipment.

203.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

A. What is its function?

- .21 Radiological fallout (RADFO) diagram
- .22 Skew temperature (Skew-T), logarithmic pressure (Log-P) diagram
- .23 Department of Defense (DOD) weather plotting chart

203.3 PRINCIPLES OF OPERATION - None to be discussed.

203.4 PARAMETERS - None to be discussed.

203.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Loss of power
- b. Loss of data
- c. Missing or doubtful data

203.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)
- b. Temperature Instruments and Observations (NWS-AG-A-079)

204.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

204.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What is the source of power?
- D. What are the modes of operation or control?
- E. What are the safety/protective devices?
- F. What protection is provided by it?
- G. What are the probable indications if this component fails?
- H. What are the positions and functions of each position?

	A	B	C	D	E	F	G	H
.21 Electric psychrometer (ML-450A/UM)	X		X	X	X	X	X	X
a. Thermometer holder	X	X						X
b. Sliding air intake	X	X					X	X
c. Battery compartment	X	X						
d. Rheostat switch	X	X						X
e. Exhaust ports	X	X						X
f. Electric fan	X	X	X	X				X
g. Water bottle	X	X						
h. Spring contact	X	X						
i. Sliding door	X	X	X					X
.22 Sling psychrometer	X	X	X	X				X
a. Sling attachment	X	X						
b. Wet-bulb thermometer	X	X	X					X
c. Dry-bulb thermometer	X	X	X					X
d. Grip	X	X						
e. Snap-link	X	X						
f. Swivel	X	X						
.23 Psychrometric computer (CP-165/UX)	X	X						X
204.3 <u>PRINCIPLES OF OPERATION</u> - None to be discussed.								
204.4 <u>PARAMETERS</u> - None to be discussed.								
204.5 <u>SYSTEM INTERFACE</u> - None to be discussed.								
204.6 <u>SAFETY PRECAUTIONS</u>								
.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?								

References:

- a. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)
- b. Basic Meteorological Equipment (NWS-AG-J-036 A/V)
- c. Wind Observation (NWS-AG-A-076)

205.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

205.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What is the source of power?
- D. What are the modes of operation or control?
- E. What are the safety/protective devices?
- F. What protection is provided by it?

- .21 Wind-measuring set (B-3)
 - a. Wind direction indicator
 - b. Wind speed indicator
 - c. Transmitter
 - d. Transmitter selector switch
- .22 Wind-measuring set (PMQ-3)
 - a. Indicator
 - b. Range selector trigger
 - c. Wind vane
 - d. Direction dial
 - e. Zero adjustment
- .23 True-wind computer (CP-264/UM)

	A	B	C	D	E	F
.21 Wind-measuring set (B-3)	X	X	X			
a. Wind direction indicator		X	X			
b. Wind speed indicator		X	X			
c. Transmitter			X	X	X	
d. Transmitter selector switch			X	X		X
.22 Wind-measuring set (PMQ-3)			X	X	X	X
a. Indicator			X	X		
b. Range selector trigger			X	X	X	X
c. Wind vane			X	X	X	X
d. Direction dial			X	X		X
e. Zero adjustment			X	X		
.23 True-wind computer (CP-264/UM)			X	X		X

205.3 PRINCIPLES OF OPERATION

- .31 How do the components work together to achieve the system's function?
- .32 What is the sequence of component involvement to initiate/accomplish a true-wind reading?

205.4 PARAMETERS - None to be discussed.

205.5 SYSTEM INTERFACE

- .51 How do the following outside influences affect this system:
 - a. Freezing precipitation
 - b. Wind in excess of 60 knots
 - c. Power fluctuation
 - d. Power surge
 - e. Loss of power

205.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. FMH-3 (NAVAIR 50-1D-3)
- b. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)
- c. Basic Meteorological Equipment (NWS-AG-J-036 A/V)

206.1 What is the function of this system?

- .11 Refer to a standard print of this system or to the actual equipment.
- .12 Refer to notes, cautions, and warnings as stated in MIMs and MRCs.

206.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the modes of operation or control?
- D. What are the safety/protective devices?
- E. What protection is provided by it?
- F. What are the probable indications if this component fails?

	A	B	C	D	E	F
.21 Ceiling light projector (ML-121)	X	X	X	X	X	X
a. Lamp		X	X			X
b. Primary reflector		X	X			X
c. Secondary reflector		X	X			X
.22 Clinometer (ML-119/ML-591/U)		X	X	X		X
.23 Ceiling balloon		X	X	X	X	X

206.3 PRINCIPLES OF OPERATION

- .31 How do the components work together to achieve the system's function?
- .32 What indications will you receive if the system is malfunctioning?

206.4 PARAMETERS

For the items listed answer the following questions:

- A. What are the normal operating values and tolerances?
- B. Where are the parameters sensed or monitored?

.41 Cloud coverage/height

206.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

.52 How does this system interface with surface weather observations?

206.6 SAFETY PRECAUTIONS

- .61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?
- .62 What special safety precautions apply to the balloon inflation rate?

References:

- a. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)
- b. NAVAIR 50-1D-510
- c. Basic Meteorological Equipment (NWS-AG-J-036 A/V)
- d. NAVAIR 50-30BIC

207.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

207.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the modes of operation or control?
- D. What are the safety/protective devices?
- E. What protection is provided by it?
- F. What are the probable indications if this component fails?

		A	B	C	D	E	F
.21	Marine barograph	X	X	X	X	X	
a.	Case		X				
b.	Chart drive assembly		X	X	X		X
c.	Hose connector		X	X			
d.	Base		X	X			
e.	Pen shaft assembly		X	X	X		X
f.	Pressure adjustment knob		X	X	X		
.22	Aneroid barometer (ML-448/UM)		X	X	X		
.23	Density altitude computer (CP-718/UR)		X	X	X	X	X

207.3 PRINCIPLES OF OPERATION

.31 What indications will you receive if the system is malfunctioning?

207.4 PARAMETERS

For the items listed answer the following questions:

- A. What are the normal operating values and tolerances?
- B. What is the physical location of the indicators?

.41 Time

.42 Pressure

207.5 SYSTEM INTERFACE - None to be discussed.

207.6 SAFETY PRECAUTIONS

- .61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?
- .62 What special safety precautions apply to:
 - a. Handling
 - b. Overwinding

References:

- a. Alden 1800 Analog/Digital Weather Graphics Recorder (Model 9500 series)
- b. Basic Meteorological Equipment (NWS-AG-J-036 A/V)
- c. Alden 9519 Marine Radio Facsimile Recorder

208.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

208.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the positions and functions of each position?

.21 Electronic assembly 1 circuit card controls

- a. AGC on/off switch
- b. Normal base band switch
- c. Speed display indicator
- d. Manual speed selector
- e. Manual feed switch
- f. Tape clock selector
- g. FSK control switch
- h. Receiver tuning aid indicators
- i. Signal monitor indicator
- j. Gamma selector
- k. Test indicator
- l. Timer to start tone indicators

.22 Electronic assembly control panel

- a. Manual start button
- b. Manual stop button
- c. Fast-feed switch
- d. Signal source select switch
- e. Background control
- f. Mode select switch
- g. Satellite select switch
- h. Format select switch

.23 Recorder head

- a. Main power switch
- b. Manual paper advance switch
- c. Manual frame switch
- d. No paper indicator light

.24 Switchbox

- a. Fuse indicator off/ok (15 amp)
- b. Master off/on switch
- c. Indicator on/ok light
- d. Line level-out (LL-out), converter-out switch

208.3 PRINCIPLES OF OPERATION - None to be discussed.

208.4 PARAMETERS - None to be discussed.

208.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Poor signal reception
- b. Loss of power
- c. Loss of signal

208.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. NAVSEA 0967-LP-034-9040
- b. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)

209.1 What is the function of this system?

- .11 Refer to a standard print of this system or to the actual equipment.
- .12 Refer to notes, cautions, and warnings as stated in MIMs and MRCs.

209.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the modes of operation or control?
- D. What are the safety/protective devices?
- E. What protection is provided by it?
- F. What are the probable indications if this component fails?
- G. What are the positions and functions of each position?

- .21 Power on/off switches (2)
- .22 Power on lamps (2)
- .23 Level controls (2)
- .24 Shift switches (2)
- .25 Function switches (2)
- .26 Polarity switches (2)
- .27 Speed switches (2)
- .28 Fuses (4)
- .29 Cathode-ray tube (CRT)

	A	B	C	D	E	F	G
.21	X	X	X	X	X	X	X
.22		X	X			X	X
.23		X	X	X		X	X
.24		X	X	X		X	X
.25		X	X	X		X	X
.26		X	X	X		X	X
.27		X	X	X		X	X
.28		X	X	X		X	X
.29		X	X	X	X		X

209.3 PRINCIPLES OF OPERATION

- .31 How do the components work together to achieve the system's function?
- .32 What indications will you receive if the system is malfunctioning?

209.4 PARAMETERS - None to be discussed.

209.5 SYSTEM INTERFACE

- .51 How does loss of power affect this system?
- .52 How does this system interface with the following:
 - a. Radio receivers
 - b. Teleprinters

209.6 SAFETY PRECAUTIONS

- .61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

210 R-1051/URR FRONT PANEL CONTROL SYSTEM 210

References:

- a. Manufacturer's Technical Manual
- b. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)

210.1 What is the function of this system?

- .11 Refer to a standard print of this system or to the actual equipment.
- .12 Refer to notes, cautions, and warnings as stated in MIMs and MRCs.

210.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the modes of operation or control?
- D. What are the safety/protective devices?
- E. What protection is provided by it?
- F. What are the probable indications if this component fails?
- G. What is the source of control signals?
- H. What are the positions and functions of each position?

	A	B	C	D	E	F	G	H
.21 Upper sideband (USB) phone jack	X	X	X			X	X	X
.22 Lower sideband (LSB) phone jack	X	X	X			X	X	X
.23 Fuses (2)	X	X		X	X	X	X	X
.24 LSB line meter	X	X	X				X	X
.25 LSB line level switch	X	X	X				X	X
.26 LSB line level control knob	X	X	X				X	X
.27 LSB phone level control knob	X	X	X				X	X
.28 Radiofrequency (RF) gain control	X	X	X				X	X
.29 Mode selector knob	X	X	X				X	X
.210 USB phone level control knob	X	X	X				X	X
.211 Beat-frequency oscillator (BFO) frequency control	X	X	X				X	X
.212 USB line meter	X	X					X	X
.213 USB line level switch	X	X	X				X	X
.214 USB line level control knob	X	X	X				X	X
.215 Cycles switch	X	X	X				X	X
.216 Fine-tuning control knob	X	X	X				X	X
.217 Megahertz (MHz) and kilohertz (kHz) control knobs	X	X	X				X	X

210.3 PRINCIPLES OF OPERATION

- .31 How do the components work together to achieve the system's function?
- .32 What indications will you receive if the system is malfunctioning?

210.4 PARAMETERS - None to be discussed.

210.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

.52 How does this system interface with the following:

- a. Teletype
- b. Facsimile machine
- c. Converter-comparator

210.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. NAVSEA 0967-LP-623-0010
- b. NAVSEA 0967-LP-623-0020

211.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

211.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What teletype applies to this component?

- .21 Keyboard transmitter
- .22 Transmitter distributor motor
- .23 Three-speed gearshift assembly
- .24 Automatic typer
- .25 AC distribution
- .26 Signal line (DC)
- .27 Fuses
- .28 Local carriage return function key
- .29 Local line feed function key
- .210 Repeat character key
- .211 Paper release lever
- .212 Double space line feed lever
- .213 End of line lamp
- .214 On/off switch
- .215 Front plate assembly
- .216 Hood release buttons

211.3 PRINCIPLES OF OPERATION - None to be discussed.

211.4 PARAMETERS - None to be discussed.

211.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

211.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. IC Electrician 3 & 2 (NAVEDTRA 10558)
- b. Local Standard Operating Procedures

212.1 What is the function of this system?

- .11 Refer to a standard print of this system or to the actual equipment.

212.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What is the source of power?
- D. What are the modes of operation or control?

		A	B	C	D
		X	X	X	X
.21	Sound-powered telephones				
a.	Headphones	X	X	X	
b.	Mouthpiece	X	X	X	
c.	Mouthpiece button	X	X	X	X
d.	Phone jack	X	X	X	
.22	Microphone control (1MC, 6MC, etc.)				
a.	On/off switch	X	X		
b.	Press-to-talk switch	X	X		
c.	Individual station buttons	X	X		
d.	Release button	X	X		
.23	Loop teletype				
a.	On/off switch	X	X		
b.	Keyboard	X			
c.	Local line feed/carriage return/paper feed	X			
d.	Figures indicator	X	X		
e.	Letters indicator	X	X		
.24	Pneumatic tube	X	X	X	X

212.3 PRINCIPLES OF OPERATION - None to be discussed.

212.4 PARAMETERS - None to be discussed.

212.5 SYSTEM INTERFACE - None to be discussed.

212.6 SAFETY PRECAUTIONS

- .61 What general safety precautions apply to this system?

213

AN/SMQ-1/3 RADIOSONDE RECEPTOR SYSTEM

213

References:

- a. NAVAIR 50-30SMQ1-501
- b. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)
- c. Aerographer's Mate 1 & C (NAVEDTRA 10362)
- d. FMH-3 (NAVAIR 50-1D-3)
- e. Guide For Supervision of Upper Air Observations (NWS-AG-J-046)

213.1 What is the function of this system?

- .11 Refer to a standard print of this system or to the actual equipment.
- .12 Refer to notes, cautions, and warnings as stated in MIMS and MRCs.

213.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What is the source of power?
- D. What are the modes of operation or control?
- E. What are the safety/protective devices?
- F. What protection is provided by it?
- G. What are the probable indications if this component fails?
- H. What is the source of control signals?

- .21 Power supply panel (PP-1812/SMQ-1)
- .22 Antenna assembly
- .23 Receiver (radiosonde AN/SMQ-1)
- .24 Recorder (R0-71/SMQ-1)
- .25 Paper table

	A	B	C	D	E	F	G	H
.21	X	X	X	X	X	X	X	X
.22	X	X	X	X			X	X
.23	X	X	X	X			X	X
.24	X	X	X				X	
.25	X	X						

213.3 PRINCIPLES OF OPERATION - None to be discussed.213.4 PARAMETERS

For the items listed answer the following questions:

- A. What are the normal operating values and tolerances?
- B. Where are the parameters sensed or monitored?
- C. What is the physical location of the indicators?

- .41 Signal strength
- .42 Receiver frequency

213.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

213.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MRCs) apply to this system?

References:

- a. FMH-3 (NAVAIR 50-1D-3)
- b. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)
- c. Aerographer's Mate 1 & C (NAVEDTRA 10362)
- d. Radiosonde Transmitter J006A Operator's Guide

214.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

214.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What is the source of power?
- D. What are the probable indications if this component fails?
- E. What are the positions and functions of each position?

	A	B	C	D	E
.21 Baroswitch section	X	X	X	X	X
.22 Thermistor		X	X	X	X
.23 Hygristor		X	X	X	X
.24 Battery		X	X	X	X
.25 Calibration chart			X	X	
.26 Antenna			X	X	X X
.27 Radiofrequency adjuster			X	X	

214.3 PRINCIPLES OF OPERATION

- .31 How do the components work together to achieve the system's function?
- .32 What indications will you receive if the system is malfunctioning?

214.4 PARAMETERS

For the items listed answer the following questions:

- A. What are the normal operating values and tolerances?
- B. Where are the parameters sensed or monitored?
- C. What is the physical location of the indicators?

	A	B	C
.41 Temperature	X	X	
.42 Humidity		X	X
.43 Pressure		X	X

214.5 SYSTEM INTERFACE

- .51 How do the following outside influences affect this system:
 - a. Power fluctuation
 - b. Power surge
 - c. Loss of power
- .52 How does this system interface with emission control (EMCON)?

214.6 SAFETY PRECAUTIONS

- .61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?
- .62 What special safety precautions apply:
 - a. To handling the transmitter
 - b. To activating the battery
 - c. When the calibration chart and baroswitch numbers do not correspond

215 BATTERY-TESTING SYSTEM

215

Reference:

a. Test Set, Battery, AN/AMM-1 (NAVWEPS 16-45-633)

215.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

215.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. What is the source of power?
- C. What are the modes of operation or control?
- D. What are the probable indications if this component fails?
- E. What are the positions and functions of each position?

.21 AN/AMM-1 test set

A	B	C	D	E
X	X	X	X	X

.22 Twin-voltmeter battery test set

X	X	X	X
---	---	---	---

215.3 PRINCIPLES OF OPERATION - None to be discussed.

215.4 PARAMETERS - None to be discussed.

215.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

.52 How does this system interface with the radiosonde transmitter?

215.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. Manufacturer's Technical Manual
- b. Aerographer's Mate 1 & C (NAVEDTRA 10362)
- c. FMH-3 (NAVAIR 50-1D-3)

216.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

216.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the safety/protective devices?

	A	B	C
.21 Motor blower	X	X	X
.22 Humidity control tray	X	X	
.23 Test leads	X	X	X
.24 Psychrometer cup assembly	X	X	
.25 Control box	X	X	
.26 Humidity control agent	X	X	

216.3 PRINCIPLES OF OPERATION - None to be discussed.

216.4 PARAMETERS - None to be discussed.

216.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

.52 How does this system interface with the following:

- a. Radiosonde transmitter
- b. Satellite receiver

216.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

.62 What special safety precautions apply to connecting test leads?

References:

- a. FMH-3 (NAVAIR 50-ID-3, Chap A-4)
- b. Guide For Supervision of Upper Air Observations (NWS-AG-J-046)

217.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

217.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What is the source of data?

.21 Chart A

- a. Data block A
- b. Surface observation data block
- c. Baseline check data block
- d. Early transmission data block
- e. Message data block
- f. Date and release time data block
- g. Isotherms
- h. Dry adiabats
- i. Relative humidity scale
- j. Pressure contact valve lines
- k. Thickness scales
- l. Constant-pressure level data
- m. Altitude scale
- n. Standard isobaric level plots
- o. Significant level plots
- p. Pressure altitude curve
- q. Temperature curve
- r. Relative humidity curve
- s. Stratum mean temperature data
- t. Dewpoint/dewpoint depression data

.22 Chart B

- a. Data block B

.23 Chart C

- a. Data block C

217.3 PRINCIPLES OF OPERATION

- .31 How do the components work together to achieve the system's function?
- .32 Which component is used below 400 mb?
- .33 Which components are used above 100 mb?

217.4 PARAMETERS

For the items listed answer the following questions:

- A. Where are the parameters sensed or monitored?
- B. What is the alarm setpoint?

.41 Superadiabatic lapse rate

217.5 SYSTEM INTERFACE - None to be discussed.

217.6 SAFETY PRECAUTIONS - None to be discussed.

218

BALLOON INFLATION SYSTEM

218

References:

- a. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)
- b. FMH-3 (NAVAIR 50-ID-3)

218.1 What is the function of this system?

- .11 Refer to a standard print of this system or to the actual equipment.

218.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the safety/protective devices?
- D. What protection is provided by it?
- E. What are the probable indications if this component fails?
- F. What are the positions and functions of each position?

	A	B	C	D	E	F
.21 Balloon	X	X	X	X		
a. 10-gram	X	X	X	X		
b. 30-gram	X	X	X	X		
c. 100-gram	X	X	X	X		
d. 300-gram	X	X	X	X		
e. 600-gram	X	X	X	X		
.22 Gas cylinder	X	X	X	X	X	
a. Regulator	X	X	X	X	X	X
b. Hose	X	X			X	
c. Reducing valve	X	X	X	X	X	X
d. Helium	X	X	X	X	X	X
.23 Universal balloon balance	X	X				X
a. Weighted mounting post	X	X				X
b. Weights	X	X				X
c. Nozzle	X	X				X
.24 Balloon train	X	X			X	X
a. Train regulator	X	X			X	X
b. Parachute	X	X			X	X
c. Transmitter	X	X			X	X
d. Balloon shroud	X	X		X		

218.3 PRINCIPLES OF OPERATION

- .31 How do the components work together to achieve the system's function?
- .32 What indications will you receive if the system is malfunctioning?

218.4 PARAMETERS

For the items listed answer the following questions:

- A. What are the normal operating values and tolerances?
- B. Where are the parameters sensed or monitored?
- C. What is the physical location of the indicators?
- D. What is the alarm setpoint?

.41 Gas pressure

218.5 SYSTEM INTERFACE - None to be discussed.

218.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. FMH-3 (NAVAIR 50-ID-3)
- b. Guide for Supervision of Upper Air Observations (NWS-AG-A-046)

219.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

219.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. What are the modes of operation or control?
- C. What information is provided by this component?

.21 Temperature evaluator

.22 Relative humidity evaluator

.23 Radiosonde observation tables

.24 Dewpoint calculator

219.3 PRINCIPLES OF OPERATION - None to be discussed.

219.4 PARAMETERS - None to be discussed.

219.5 SYSTEM INTERFACE - None to be discussed.

219.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. NAVAIR 50-30SMQ6-1
- b. NAVAIR 50-30R0-1
- c. NAVAIR 50-30SMQ6-4
- d. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)

220.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

220.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the positions and functions of each position?

	A	B	C
.21 Antenna	X	X	X
.22 Facsimile receiver-recorder	X	X	
.23 Tape recorder-amplifier	X	X	
.24 Power and distribution control	X	X	
.25 Receiver	X	X	
.26 Weather data facsimile recorder (R0-402/UMH)	X	X	

220.3 PRINCIPLES OF OPERATION

.31 Using a diagram of the system, show the path of the satellite signal from the antenna to the facsimile recorder.

220.4 PARAMETERS - None to be discussed.220.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

220.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. NAVAIR 50-30SMQ6-6
- b. NAVAIR 50-30SMQ6-8
- c. NAVAIR 50-30SMQ6-9
- d. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)

221.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

221.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the modes of operation or control?

	<u>A B C</u>
.21 Antenna pedestal (AB-1080/SMQ-6(V), 2559/SMQ-6C, AB-1246/SMQ-6D)	X X
.22 Steerable antenna (OE-181/SMQ-6C(V))	X X X

k.	Keyboard keys	X	X	

221.3 PRINCIPLES OF OPERATION - None to be discussed.

221.4 PARAMETERS

For the items listed answer the following questions:

- A. Where are the parameters sensed or monitored?
- B. What is the physical location of the indicators?
- C. What is the alarm setpoint?

- .41 Antenna elevation
- .42 Antenna AZ

221.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

221.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. NAVAIR 50-30SMQ6-1
- b. Marantz Handbook of Instruction

222.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

222.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the modes of operation or control?
- D. What is the source of control signals?
- E. What are the positions and functions of each position?

.21 Magnetic tape recorder (R0-351/SMQ-6(V))

- a. Cueing meter and reset pushbutton
- b. Power lamp
- c. Off/on switch
- d. Remote-local switch
- e. Slow-fast switch
- f. Rewind pushbutton switch
- g. Record pushbutton switch
- h. Safety pushbutton switch
- i. Stop pushbutton switch
- j. Cue pushbutton switch
- k. Play pushbutton switch
- l. HI-FWD pushbutton switch
- m. 3rd head - 4th head switch

A	B	C	D	E
X	X	X	X	X

.22 Amplifier oscillator (AM-4969/SMQ-6(V))

- a. Equalizer switch
- b. Meter and output switch
- c. Volume unit (VU) meters CH1 and CH2
- d. Record selector switch
- e. Record indicators
- f. Power switch
- g. Phone switch
- h. Phone jack
- i. Reproduce master control
- j. Reproduce CH1 control
- k. Reproduce CH2 control
- l. Record auxiliary CH1 control
- m. Record auxiliary CH2 control
- n. Record microphone CH1 control
- o. Record microphone CH2 control
- p. Record master control
- q. Microphone input jacks CH1 and CH2

222.2 SYSTEM COMPONENTS AND COMPONENT PARTS (CONT'D)

	A	B	C	D	E
.23 Stereo cassette deck (model 5220)	X	X	X	X	X
.24 Power on/off switch	X	X			
.25 Tape transport controls	X	X			
a. Eject button	X	X			
b. Record button	X	X			
c. Rewind button	X	X			
d. Play button	X	X			
e. Fast forward button	X	X			
f. Stop button	X	X			
g. Pause button	X	X			
.26 VU meters	X	X			
.27 Input level control	X	X			
.28 Microphone jacks	X	X			
.29 Dolby switches	X	X			
.210 Bias equalization selector	X	X			
.211 Headphone jack	X	X			
.212 Cassette compartment	X	X			

222.3 PRINCIPLES OF OPERATION - None to be discussed.

222.4 PARAMETERS - None to be discussed.

222.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

222.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

223

AN/SMQ-6(V) POWER AND DISTRIBUTION CONTROL SYSTEM

223

Reference:

- a. NAVAIR 50-30SMQ6-1

223.1 What is the function of this system?

- .11 Refer to a standard print of this system or to the actual equipment.

223.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the positions and functions of each position?

223.2 SYSTEM COMPONENTS AND COMPONENT PARTS (CONT'D)

	A	B	C
.21 External input and monitor receptacle	X	X	
.23 Calibrator function switch	X	X	X
.24 Clock error lamp	X	X	
.25 Clock adjust wheels	X	X	
.26 Greenwich-mean-time (GMT) clock	X	X

.211 Main power switch	X	X	
.212 Power lamp	X	X	
.213 Gray scale control	X	X	
.214 Calibration lamp	X	X	
.215 Precision power supply failure lamp	X	X	
.216 Manual-auto switch	X	X	

223.3 PRINCIPLES OF OPERATION - None to be discussed.223.4 PARAMETERS - None to be discussed.223.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

223.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. NAVAIR 30-50SMQ6-1
- b. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)

224.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

224.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?

- .21 Video level control
- .22 Voltage-controlled oscillator (VCO) zero screwdriver control
- .23 Audio level control
- .24 Frequency switch
- .25 Zero screwdriver control
- .26 Signal strength meter
- .27 Power switch and lamp
- .28 Lock loss lamp
- .29 1.5A 3AG fuse
- .210 Speaker

224.3 PRINCIPLES OF OPERATION - None to be discussed.

224.4 PARAMETERS - None to be discussed.

224.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

224.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. NAVAIR 50-30R0-1
- b. Aerographer's Mate 3 & 2 (NAVEDTRA 10363)

225.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

225.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the positions and functions of each position?

		A	B	C
.21	Mode selection section	X	X	
	a. Power on pushbutton switch	X	X	
	b. Visual/1R switch	X	X	
	c. Synchronize internal (SYNC-INT)/synchronize external (SYNC-EXT) switch	X	X	
	d. Mode positive (MOD POS)/mode negative (MOD NEG) switch	X	X	
	e. Clear/standby switch	X	X	
	f. Automatic picture transmission (APT)/weather facsimile (WEFAX) mode switch	X	X	
	g. High scanning radiometer (SR) mode switch	X	X	
	h. High SR-expand mode switch	X	X	
	i. Low SR mode switch	X	X	
	j. Low SR-expand mode switch	X	X	
.22	Greenwich-mean-time (GMT) clock section	X	X	
	a. Function control switch	X	X	
	b. Lamp test or clock latch switch	X	X	X
.23	Gridding section	X	X	
	a. On switch	X	X	
	b. Setup/gridding switch	X	X	
	c. Set pushbutton switch	X	X	
	d. Advance pushbutton switch	X	X	
	e. Return pushbutton switch	X	X	
	f. Speed control	X	X	
	g. Grid alignment control	X	X	
	h. Centering control	X	X	
	i. Anode current indicator	X	X	
	j. Brightness control	X	X	
.24	Print section	X	X	
	a. Anode current indicator	X	X	
	b. Darken print control	X	X	
	c. Contrast control	X	X	
	d. Event marker pushbutton switch	X	X	
	e. Video selection switch	X	X	
	f. Paper used indicator	X	X	X
	g. Development temperature indication	X	X	

225.3 PRINCIPLES OF OPERATION - None to be discussed.

225.4 PARAMETERS - None to be discussed.

225.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

225.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. NAVAIR 50-30SMQ10-1
- b. NAVAIR 50-30SMQ10-1-5-5
- c. NAVAIR 50-30SMQ1-7-1

226.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

226.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What is the source of power?
- D. What are the modes of operation or control?
- E. What are the safety/protective devices?
- F. What protection is provided by it?
- G. What is the source of control signals?
- H. What are the positions and functions of each position?

	A	B	C	D	E	F	G	H
.21 Teletypewriter	X	X	X	X	X			
.22 Primary power unit	X	X	X			X	X	
.23 Personnel safety unit	X	X						X
.24 Pedestal junction box	X	X						
.25 Antenna assembly	X	X	X					X
.26 Base band unit	X	X	X	X	X			
a. Base band receiver test set	X	X	X	X				X
b. Base band receiver	X	X	X	X				
c. 4V DC power supply	X	X	X	X				
d. 28V DC power supply	X	X	X	X				
.27 Port receiver unit	X	X	X	X				
a. Parametric amplifier down converter control panel	X	X	X					
b. Demodulator/bit synchronizer	X	X	X	X				
c. Recorder-reproducer	X	X	X	X	X			
d. Demodulator/bit synchronizer power supply assembly	X	X	X	X	X			
.28 Simulator unit	X	X	X					
a. Oscilloscope	X	X	X	X				
b. Receiver/signal simulator patch panel	X	X	X					
c. Receiver/signal simulator control	X	X	X					
d. Digital magnetic tape recorder-reproducer	X	X	X	X				
e. Tape search unit	X	X	X	X				
f. 28V DC unregulated power supply	X	X	X					
.29 Starboard receiver unit	X	X	X					
a. Parametric amplifier down converter control panel	X	X	X					X
b. Demodulator/bit synchronizer	X	X	X	X				
c. Time-code generator buffer	X	X	X					
d. Servo power supply assembly	X	X	X					
e. Demodulator/bit synchronizer power supply	X	X	X					

226.2 SYSTEM COMPONENTS AND COMPONENT PARTS (CONT'D)

	A	B	C	D	E	F	G	H
.210 Antenna control unit	X	X	X	X				
a. Power control and status panel	X	X	X					
b. Antenna control assembly	X	X	X	X	X			
c. Antenna positioning computer	X	X	X	X	X			
d. Computer power supply assembly	X	X	X					
.211 Display data processing unit	X	X	X	X				
a. Digital magnetic tape recorder-reproducer	X	X	X	X				
b. Display computer	X	X	X	X	X			
c. Computer power supply assembly	X	X	X					
.212 Hard copy generator unit	X	X	X	X				
a. AC power control assembly	X	X	X	X				
b. Display control panel	X	X	X	X	X			
c. Optical assembly (camera)	X	X	X					
d. Film processor	X	X	X					
.213 Computer/display interface control unit	X	X	X	X				
a. Display computer interface	X	X	X					
b. Decommutator	X	X	X	X				
c. Display buffer	X	X	X					

226.3 PRINCIPLES OF OPERATION

.31 How do the components work together to achieve the system's function?

226.4 PARAMETERS

For the items listed answer the following questions:

- A. What are the normal operating values and tolerances?
- B. Where are the parameters sensed or monitored?
- C. What is the physical location of the indicators?
- D. What is the alarm setpoint?

- .41 Base band DC voltage
- .42 Parametric amplifier temperature
- .43 Receiver signal strength
- .44 Primary power voltage
- .45 Primary power frequency

226.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

226.6 SAFETY PRECAUTIONS

- .61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?
- .62 What special safety precautions apply to the hazards of film processor mechanics and chemicals?

References:

- a. NAVAIR 50-30SMQ-1-3-5
- b. NAVAIR 50-30SMQ10-1-3-1
- c. M-14-G Portable Recorder-Reproducer (NAVSEA 0992-LP-675-0001)

227.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

227.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What protection is provided by it?
- D. What are the positions and functions of each position?

	A	B	C	D
.21 2A1 CB1 circuit breaker	X	X	X	
.22 2A1 CB2 circuit breaker	X	X	X	
.23 2A1 main power switch	X	X		
.24 2A1 stage one switch	X	X		
.25 2A1 stage two switch	X	X		
.26 2A2 data source switch	X	X		
.27 2A2 bit rate switch	X	X		X
.28 2A2 loop bandwidth switch	X	X		X
.29 2A2 meter select switch	X	X		X
.210 2A2 frequency switch	X	X		X
.211 2A2 loop disable button	X	X		X
.212 2A2 frequency acquisition switch	X	X		X
.213 2A2 gain switch	X	X		
.214 2A2 tuning switch	X	X		
.215 2A2 signal threshold switch	X	X		
.216 2A3 forward switch	X	X		
.217 2A3 stop switch	X	X		
.218 2A3 record switch	X	X		
.219 2A3 fast-wind switch	X	X		
.220 2A3 reverse switch	X	X		
.221 2A3 fast-rewind switch	X	X		
.222 2A3 transport power switch	X	X		
.223 2A3 main power switch	X	X		
.224 2A3 tape speed switch	X	X		X

227.3 PRINCIPLES OF OPERATION - None to be discussed.

227.4 PARAMETERS - None to be discussed.

227.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

227.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. Oscilloscope (NAVSEA 0967-LP-467-4010)
- b. NAVAIR 50-30SMQ10-1-4-1
- c. NAVAIR 50-30SMQ10-1-5-3
- d. NAVAIR 50-30SMQ10-1-3-6

228.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

228.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the positions and functions of each position?

	A	B	C
.21 3A1 intensity control	X	X	
.22 3A1 power ON switch	X	X	
.23 3A1 focus control	X	X	
.24 3A1 horizontal position control	X	X	
.25 3A1 vertical gain control	X	X	
.26 3A1 delay vernier switch	X	X	
.27 3A1 beamfinder button	X	X	
.28 3A1 CH1 position control	X	X	
.29 3A1 CH2 position control	X	X	
.210 3A1 vertical mode switch	X	X	
.211 3A1 volts/division (DIV) switch	X	X	X
.212 3A1 AC/ground (GND)/DC switch	X	X	X
.213 3A1 level switch	X	X	
.214 3A1 coupling switch	X	X	X
.215 3A1 slope switch	X	X	X
.216 3A1 source switch	X	X	X
.217 3A1 time/division (DIV) switch	X	X	X
.218 3A1 level-horizontal gain switch	X	X	X
.219 3A3 oscillator switch	X	X	
.220 3A3 biphase/sweep switch	X	X	X
.221 3A3 marker switch	X	X	X
.222 3A3 attenuator dial	X	X	
.223 3A3 port/stbd/operate switch	X	X	
.224 3A3 parametric amplifier (PAR AMP)/PROBE/DN CONU switch	X	X	X
.225 3A3 normal/reverse switch	X	X	X
.226 3A3 clock phase switch	X	X	X
.227 3A3 active channel switch	X	X	X
.228 3A3 power switch	X	X	
.229 3A4 unit 1 track button	X	X	
.230 3A4 unit 2 track button	X	X	
.231 3A4 power key	X	X	
.232 3A5 advance/retard (ADV/RET) switch	X	X	

228.2 SYSTEM COMPONENTS AND COMPONENT PARTS (CONT'D)

	A	B	C
.233 3A5 start switch	X	X	X
.234 3A5 timing switch	X	X	
.235 3A5 preset switch	X	X	X
.236 3A5 mode switch	X	X	X
.237 3A5 tape control switches	X	X	
.238 3A5 error bypass switch	X	X	
.239 3A5 start tape switches	X	X	X
.240 3A5 stop tape switches	X	X	X
.241 3A5 propagation decay switches	X	X	

228.3 PRINCIPLES OF OPERATION - None to be discussed.

228.4 PARAMETERS - None to be discussed.

228.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

228.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. NAVAIR 50-30SMQ10-1-3-5
- b. NAVAIR 50-30SMQ10-1-3-1
- c. NAVAIR 50-30SMQ10-1-2-3

229.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

229.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What protection is provided by it?
- D. What are the positions and functions of each position?

		A	B	C	D
.21	4A1 CB1 circuit breaker	X	X	X	
.22	4A1 CB2 circuit breaker	X	X	X	
.23	4A1 main power switch		X	X	
.24	4A1 stage one switch		X	X	
.25	4A1 stage two switch		X	X	
.26	4A2 data source switch		X	X	
.27	4A2 bit rate switch		X	X	X
.28	4A2 loop bandwidth switch		X	X	X
.29	4A2 meter select switch		X	X	X
.210	4A2 frequency switch		X	X	X
.211	4A2 loop disable button		X	X	
.212	4A2 frequency acquisition switch		X	X	
.213	4A2 gain switch		X	X	
.214	4A2 tuning switch		X	X	
.215	4A2 signal threshold switch		X	X	
.216	4A3 synchronize switch		X	X	
.217	4A3 delay switch		X	X	X
.218	4A3 display switch		X	X	
.219	4A3 volume control		X	X	
.220	4A3 worldwide voice/worldwide voice Hawaii (WWV/WWVH) switch		X	X	
.221	4A3 ship/system switch		X	X	
.222	4A3 run/hold switch		X	X	
.223	4A3 load switch		X	X	

229.3 PRINCIPLES OF OPERATION - None to be discussed.

229.4 PARAMETERS - None to be discussed.

229.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

229.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. NAVAIR 50-30SMQ10-1-2-1
- b. NAVAIR 50-30SMQ10-1-2-2
- c. NAVAIR 50-30SMQ10-1-5-4

230.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

230.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What protection is provided by it?
- D. What are the positions and functions of each position?

	A	B	C	D
.21 Port conical scan switch	X	X		
.22 Port azimuth switch			X	X
.23 Port elevation switch			X	X
.24 Starboard conical scan switch			X	X
.25 Starboard azimuth switch			X	X
.26 Starboard elevation switch			X	X
.27 Synchronize switch			X	X
.28 Ship's inertial navigation system (SINS) switch			X	X
.29 Buzzer pushbutton			X	
.210 Emergency off button			X	
.211 Servo power switch			X	X
.212 Port azimuth limit switch			X	X
.213 Port elevation limit switch			X	X
.214 Starboard azimuth limit switch			X	X
.215 Starboard elevation limit switch			X	X
.216 Deck-space switch			X	X
.217 Azimuth position handle			X	X
.218 Elevation position handle			X	X
.219 Elevation rate handle			X	X
.220 Mode control switches			X	X
.222 Display register switches			X	X
.223 Program halt switches			X	X
.224 Sense switches			X	X
.225 Auto-manual switch			X	X
.226 Boot enable switch			X	X
.227 Parity error inhibit (PE INHB) switch			X	X
.228 Master clear (MA CLR) halt-run switch			X	X

230.3 PRINCIPLES OF OPERATION - None to be discussed.

230.4 PARAMETERS - None to be discussed.

230.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

230.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

231 AN/SMQ-10 DISPLAY DATA PROCESSING UNIT FRONT PANEL CONTROL
 SYSTEM

231

References:

- a. NAVAIR 50-30SMQ10-1-5-3
- b. NAVAIR 50-30SMQ10-1-5-4

231.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

231.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the positions and functions of each position?

	A	B	C
.21 Unit 1 track button	X	X	
.22 Unit 2 track button	X	X	
.23 Power key	X	X	
.24 Display register switches	X	X	X
.25 Program halt switches	X	X	X
.26 Sense switches	X	X	X
.27 Auto-manual switch	X	X	X
.28 Boot enable switch	X	X	X
.29 Parity error inhibit (PE INHB) switch	X	X	X
.210 Master clear (MA CLR) halt-run switch	X	X	X

231.3 PRINCIPLES OF OPERATION

.31 How do the components work together to achieve the system's function?

231.4 PARAMETERS - None to be discussed.

231.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

231.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

Reference:

a. NAVAIR 50-30SMQ10-1-5-2

232.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

232.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

A. What is its function?
B. Where is it located?
C. What are the positions and functions of each position?

	A	B	C
.21 Primary 3-phase power switch	X	X	
.22 Secondary AC power switches	X	X	
.23 Test pattern generator switches	X	X	X
.24 Display mode switches	X	X	X
.25 Display clear button	X	X	

232.3 PRINCIPLES OF OPERATION - None to be discussed.

232.4 PARAMETERS - None to be discussed.

232.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

a. Power fluctuation
b. Power surge
c. Loss of power

232.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

235

FREQUENCY SHIFT CONVERTER (CV-1066/UX) FRONT PANEL CONTROL
SYSTEM

235

Reference:

- a. Manufacturer's Technical Manual

235.1 What is the function of this system?

- .11 Refer to a standard print of this system or to the actual equipment.
- .12 Refer to notes, cautions, and warnings as stated in MIMs and MRCs.

235.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the modes of operation or control?
- D. What are the safety/protective devices?
- E. What protection is provided by it?
- F. What are the probable indications if this component fails?
- G. What are the positions and functions of each position?

- .21 Input level and power switches
- .22 Volume control knob
- .23 Tuning knob
- .24 Primary power fuses
- .25 Power indicating gauge

	A	B	C	D	E	F	G
.21	X	X	X	X	X	X	X

.23	X	X	X	X	X	X	X
.24	X	X	X	X	X	X	X
.25	X	X	X	X	X	X	X

235.3 PRINCIPLES OF OPERATION

- .31 What indications will you receive if the system is malfunctioning?

235.4 PARAMETERS - None to be discussed.235.5 SYSTEM INTERFACE

- .51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

- .52 How does this system interface with the following:

- a. Facsimile recorder
- b. Radio receiver

235.6 SAFETY PRECAUTIONS

- .61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

236 FREQUENCY SHIFT CONVERTER (CV-2979/UX) FRONT PANEL CONTROL SYSTEM

236

Reference:

a. NAVSEA 0967-LP-433-6010, Figure 3-2

236.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

236.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the safety/protective devices?
- D. What protection is provided by it?
- E. What are the probable indications if this component fails?
- F. What are the positions and functions of each position?

- .21 Power switch
- .22 Power indicator
- .23 Frequency meter

A	B	C	D	E	F

	X	X			
X	X				

236.3 PRINCIPLES OF OPERATION

.31 How do the components work together to achieve the system's function?

236.4 PARAMETERS - None to be discussed.

236.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Loss of power
- b. Poorly tuned/mistuned radio facsimile signal
- c. Power fluctuation
- d. Power surge

236.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

References:

- a. NAVAIR 50-30SMQ1-501
- b. Manufacturer's Technical Manual

237.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

237.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What are the safety/protective devices?
- D. What are the positions and functions of each position?

	A	B	C	D
.21 Frequency selector switch and scale	X	X		X
.22 Fuses	X	X	X	
.23 Pilot light			X	X
.24 Power switch			X	X
.25 Power input indicator			X	X
.26 Jacks			X	X

237.3 PRINCIPLES OF OPERATION - None to be discussed.

237.4 PARAMETERS - None to be discussed.

237.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Power fluctuation
- b. Power surge
- c. Loss of power

237.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

238 INTEGRATED REFRACTIVE EFFECTS PREDICTION SUPPORT (IREPS)

238

Reference:

a. Naval Ocean Systems Command T-D-236

238.1 What is the function of this system?

.11 Refer to a standard print of this system or to the actual equipment.

238.2 SYSTEM COMPONENTS AND COMPONENT PARTS

Discuss the designated items for the following components and component parts:

- A. What is its function?
- B. Where is it located?
- C. What is the source of power?
- D. What are the modes of operation or control?
- E. What are the safety/protective devices?
- F. What protection is provided by it?
- G. What are the probable indications if this component fails?
- H. What are the positions and functions of each position?

.21 HP9845A computer unit
.22 Magnetic tapes
.23 Sounding unit

- i. Input
- j. Signal monitor
- k. Manual feed
- l. Speed display

239.3 PRINCIPLES OF OPERATION - None to be discussed.

239.4 PARAMETERS - None to be discussed.

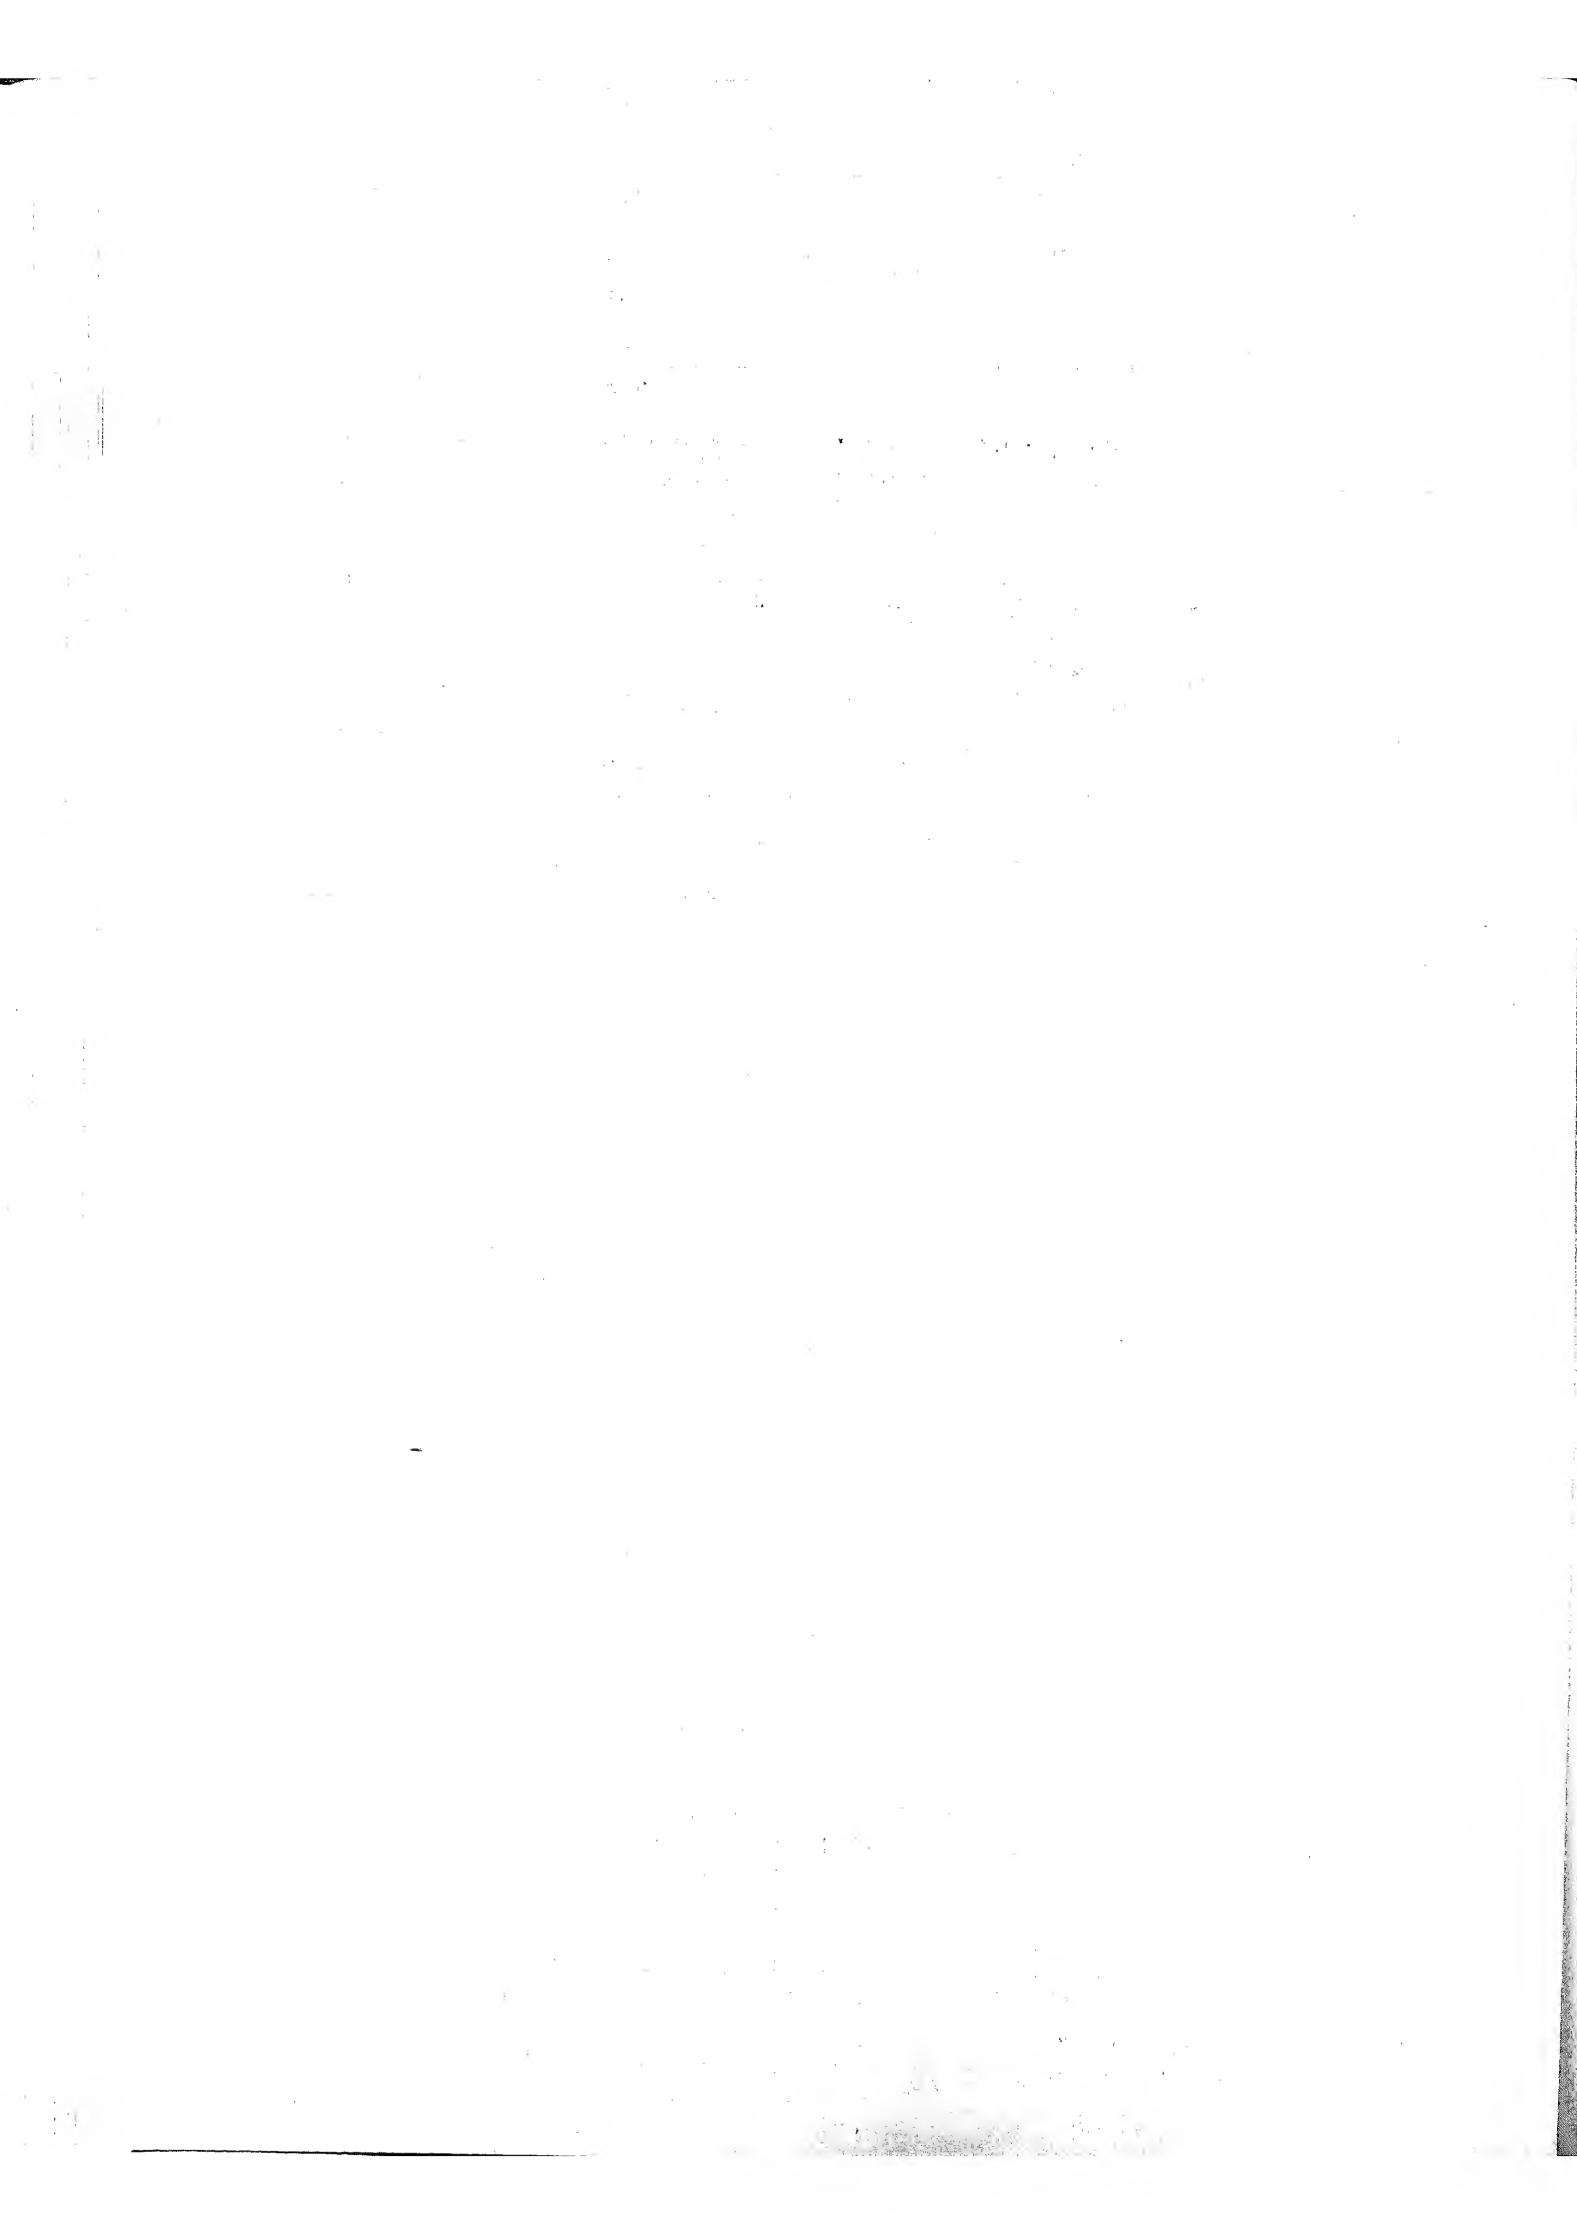

239.5 SYSTEM INTERFACE

.51 How do the following outside influences affect this system:

- a. Poor signal reception
- b. Loss of power
- c. Loss of signal
- d. Power fluctuation
- e. Power surge

239.6 SAFETY PRECAUTIONS

.61 What general safety precautions (as described in MIMs, MRCs, etc.) apply to this system?

FINAL QUALIFICATION AS
CHART PLOTTER

NAME _____ RATE/RANK _____

This page is to be used as a record of satisfactory completion of designated sections of the Personnel Qualification Standard (PQS). Only specified supervisors may signify completion of applicable sections either by written or oral examination, or by observation of performance. The examination or checkout need not cover every item; however, a sufficient number should be covered to demonstrate the examinee's knowledge. Should supervisors "give away" their signatures, unnecessary difficulties can be expected in future routine operations.

This qualification section is to be maintained by the trainee and updated to ensure awareness of remaining tasks.

QUALIFICATION

Having observed satisfactory performance, it is recommended the trainee be designated a qualified CHART PLOTTER (301).
